Description:

VeeGo is a modern and user-friendly mobile application designed to make vehicle rentals quick, easy, and hassle-free. Whether you need a bike for a short trip, a car for a family outing, or a van for moving goods, VeeGo lets you find, book, and rent vehicles instantly through your mobile device. With features like instant booking, flexible rental options, insurance coverage, and 24/7 customer support, VeeGo ensures a smooth rental experience for all users.
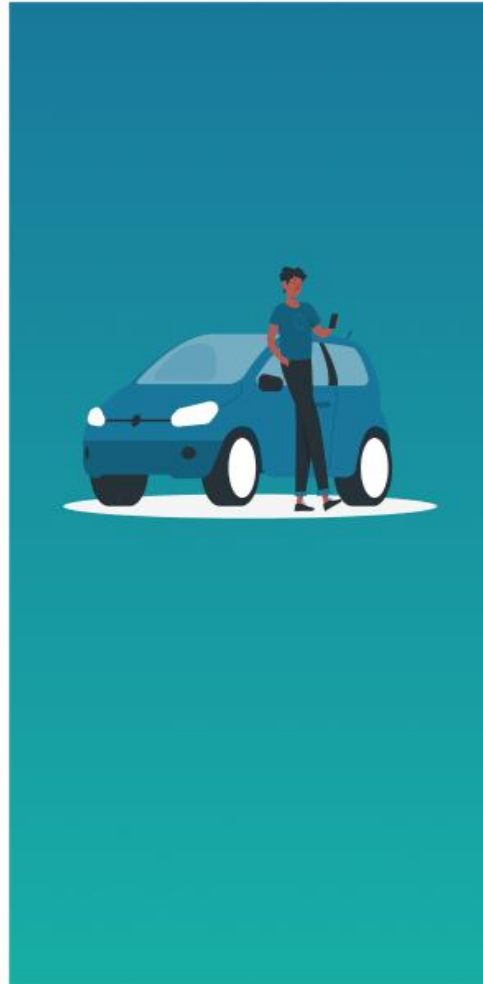

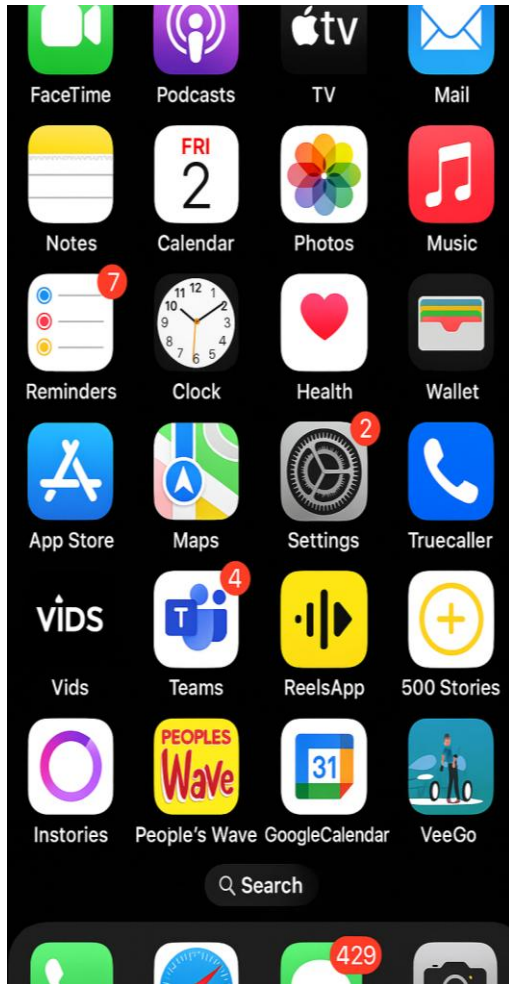

Key Features:

1. **Browse and search for vehicles** – Users can easily find cars, bikes, and vans by filtering results based on category, location, and rental price, ensuring they get exactly what they need.
2. **Instant booking or scheduled rentals** – VeeGo allows users to rent a vehicle instantly for immediate use or schedule a booking in advance for future trips.
3. **Real-time availability and pricing** – Vehicle listings show up-to-date availability and rental rates, so users can make quick and informed decisions.
4. **Secure payments with detailed checkout** – Integrated payment gateways ensure safe and smooth transactions, with a clear breakdown of rental costs before confirmation.
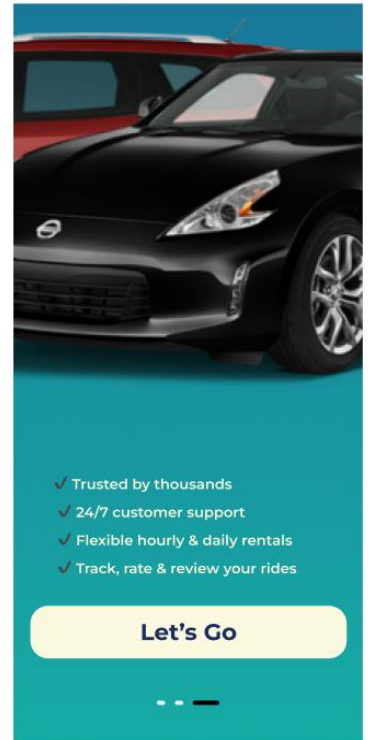

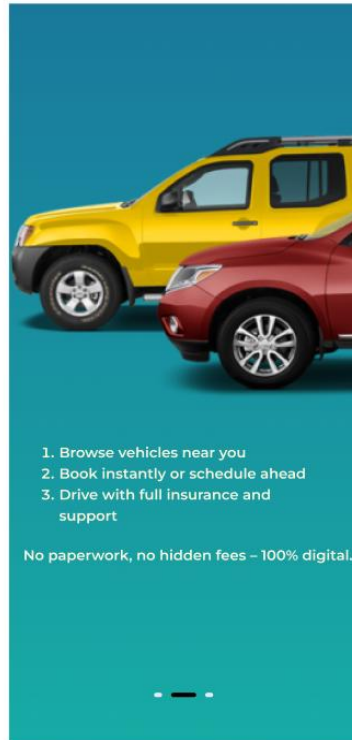

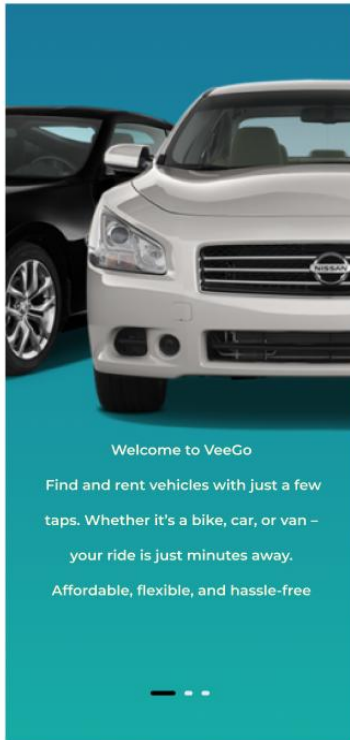

5. **Detailed vehicle information** – Each vehicle profile displays specifications, features, included accessories, and clear photos to help users choose confidently.
6. **Account management and booking tracking** – Users can update their personal details, manage rental history, and check the status of ongoing bookings directly in the app.
7. **Light and dark theme support** – VeeGo offers both light and dark mode options, making the app comfortable to use in different lighting conditions.
8. **24/7 customer support and notifications** – Users receive instant notifications about booking updates, offers, and reminders, while having access to round-the-clock customer service.
